CONTENTS OF VOLUME 266

NUMBER 1, OCTOBER 1988

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

The Reduction of Putidaredoxin Reductase by Reduced Pyridine Nucleotides
Peter W. Roome and Julian A. Peterson 32

The Oxidation of Reduced Putidaredoxin Reductase by Oxidized Putidaredoxin
Peter W. Roome and Julian A. Peterson 41

Mitochondrial Sulfhydryl Groups under Oligomycin-Inhibited, Aging, and Uncoupling Conditions: Beneficial Influence of Cardioprotective Drugs
Jürgen Fuchs, Hans-Joachim Freisleben, Luise Mainka, and Guido Zimmer 83

Reactivity of Mitochondrial Sulfhydryl Groups toward Dithionitrobenzoic Acid and Bromobimanes under Oligomycin-Inhibited and Uncoupling Conditions
Hans-Joachim Freisleben, Jürgen Fuchs, Luise Mainka, and Guido Zimmer 89

Motility, Heat, and Lactate Production in Ejaculated Bovine Sperm
Roy H. Hammerstedt, Cinzia Volonté, and Efraim Racker 111

Pyrophosphate Formation from Acetyl Phosphate and Orthophosphate: Evidence for Heterogeneous Catalysis
José Roberto Meyer-Fernandes and Adalberto Vieyra 132

Reaction between *ortho*-Semiquinones and Oxygen: Pulse Radiolysis, Electron Spin Resonance, and Oxygen Uptake Studies
B. Kalyanaraman, W. Korytowski, B. Pilas, T. Sarna, E. J. Land, and T. G. Truscott 277

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Properties of a Highly Purified Mitochondrial Deoxyguanosine Kinase
Inshik Park and David H. Ives 51

GLYCOPROTEINS AND GLYCOLIPIDS

Only Trace Amounts of Fatty Acids Are Found in Pure Mucus Glycoproteins
Gunnar C. Hansson, John K. Sheehan, and Ingemar Carlstedt 197

Glycosaminoglycan Polysulfate-Induced Stimulation of Hyaluronic Acid Synthesis in Rabbit Knee Synovial Membrane: Involvement of Binding Protein and Calcium Ion *Hitoshi Nishikawa, Itsuhiko Mori, and Junji Umemoto* 201

Structural Studies on the Carbohydrate Moieties of Human Liver α-L-Fucosidase
Sulabha P. Argade, Robert L. Hopfer, Anne-Marie Strang, Herman van Halbeek, and Jack A. Alhadeff 227

LIPIDS AND PROSTAGLANDINS

Changes in Dehydrodolichyl Diphosphate Synthase during Spermatogenesis in the Rat *Zhong Chen, Carol Morris, and Charles M. Allen* 98

CTP-Dependent Lipid Kinases of Yeast
Anna Szkopińska, Leszek Nowak, Ewa Świeżewska, and Grażyna Palamarczyk 124

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

MgATP-Dependent, Glucose 6-Phosphate-Stimulated Liver Microsomal Ca^{2+} Accumulation: Difference between Rough and Smooth Microsomes
Andrea Romani, Rosella Fulceri, Alfonso Pompella, and Angelo Benedetti 1

Inactivation of the Thiamine Transport System in *Saccharomyces cerevisiae* with *O*-Bromoacetylthiamine
Hiroshi Nishimura, Kenji Sempuku, Kazuto Nosaka, and Akio Iwashima 248

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Prostaglandin H Synthase: Distinct Binding Sites for Cyclooxygenase and Peroxidase Substrates *Paul J. Marshall and Richard J. Kulmacz* 162

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Association–Dissociation Studies of Bovine and Rat Liver Glutamic Dehydrogenase by High-Performance Liquid Chromatography Gel Filtration
Ronald L. Jenkins, Richard L. Ong, S. Wayne Parrish, and Huey G. McDaniel 72

A Molecular Shape Analysis and Quantitative Structure–Activity Relationship Investigation of Some Triazine-Antifolate Inhibitors of *Leishmania* Dihydrofolate Reductase *M. G. Koehler, K. Rowberg-Schaefer, and A. J. Hopfinger* 152

Cobinding of Bilirubin and Laurate to Human Serum Albumin: Spectroscopic Characterization of Stoichiometric Complexes
Bent Honoré, Hiroshi Sato, and Rolf Brodersen 189

Zinc Binding to Fibrinogen and Fibrin *Gerard Marx* 285

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Labeling of Porphobilinogen Deaminase by Radioactive 5-Aminolevulinic Acid in Isolated Developing Pea Chloroplasts
Paul A. Castelfranco, Susan S. Thayer, Jack Q. Wilkinson, and Bruce A. Bonner 219

Arginine Chemical Modification of *Petunia hybrida* 5-*enol*-Pyruvylshikimate-3-phosphate Synthase
Stephen R. Padgette, Christine E. Smith, Q. Khai Huynh, and Ganesh M. Kishore 254

Characterization of Cyanogenic β-Glucosidase (Linamarase) and Cassava (*Manihot esculenta* Crantz) *Thidarat Eksittikul and Montri Chulavatnatol* 263

Temperature Dependence and Mercury Inhibition of Tonoplast-Type H^+-ATPase
Shu-I Tu, Janine N. Brouillette, Gerald Nagahashi, David Brauer, and Edwin Nungesser 289

PROTEIN STRUCTURE AND FUNCTION

Fructose-1,6-bisphosphate Aldolase from *Drosophila melanogaster:* Primary Structure Analysis, Secondary Structure Prediction, and Comparison with Vertebrate Aldolases
Antoine A. Malek, Malene Hy, Annemarie Honegger, Keith Rose, and Olga Brenner-Holzach 10

Botulinum Neurotoxin Type A: Cleavage of the Heavy Chain into Two Halves and Their Partial Sequences
V. Sathyamoorthy, B. R. Dasgupta, J. Foley, and R. L. Niece 142

Characterization of Nicked Myotoxin *a* and Its Effect on the Sarcoplasmic Reticulum Calcium Pump *Nobuhiro Mori, Anthony T. Tu, and Andreas Maurer* 171
Acylation of Gelatin-Agarose and the Enhancement by Heparin of Fibronectin Binding *Robert L. Smith and Charles A. Griffin* 181
A Rapid Purification Method for Rat Liver Pyruvate Carboxylase and Amino Acid Sequence Analyses of NH_2-Terminal and Biotin Peptide *K. George Thampy, Wei-Yong Huang, and Salih J. Wakil* 270

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Presence of Nontryptophan Fluorophores Specifically Bound to γ_2-Crystallin *P. Stiuso, D. Pulcini, R. Ragone, L. Miele, G. Della Pietra, and G. Colonna* 61

REGULATION OF METABOLISM AND OF ENZYME ACTION

Monovalent Cations and Inorganic Phosphate Alter Branched-Chain α-Ketoacid Dehydrogenase–Kinase Activity and Inhibitor Sensitivity *Yoshiharu Shimomura, Martha J. Kuntz, Masashige Suzuki, Takayuki Ozawa, and Robert A. Harris* 210

NUMBER 2, NOVEMBER 1, 1988

COMMUNICATIONS

Human Placental Fibronectin: Demonstration of Structural Differences between the A and B Chains in the Extra Domain-A Region *Tim Tressel, John E. Shively, and Hema Pande* 639
Isolation of Sealed Plasma Membrane Vesicles from *Phytophthora megasperma* f. sp. *glycinea:* II. Partial Characterization of Ca^{2+} Transport and Glyceollin Effects *John L. Giannini, Jana S. Holt, and Donald P. Briskin* 644

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Alterations in Hepatocyte Cytoskeleton Caused by Redox Cycling and Alkylating Quinones *Hjördis Thor, Francesca Mirabelli, Alberto Salis, Gerald M. Cohen, Giorgio Bellomo, and Sten Orrenius* 397
Increased NADPH-Dependent Chemiluminescence by Microsomes after Chronic Ethanol Consumption *Susana Puntarulo and Arthur I. Cederbaum* 435
Hemoglobin-Mediated Oxidation of the Carcinogen 1,2-Dimethylhydrazine to Methyl Radicals *Luis E. S. Netto, Luciana C. C. Leite, and Ohara Augusto* 562
Two Monoclonal Antibody Lines Directed against Subunit IV of Cytochrome Oxidase: A Study of Opposite Effects *Wen-Zhi Gai, Shu-Man Sun, You-Zhan Ding, Jo A. Freedman, and Samuel H. P. Chan* 628

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Differential Expression of α, μ and π Classes of Isozymes of Glutathione *S*-Transferase in Bovine Lens, Cornea, and Retina *Hassan Ahmad, Shivendra V. Singh, Rheem D. Medh, G. A. S. Ansari, Alexander Kurosky, and Yogesh C. Awasthi* 416
Role of Carbohydrate Content on the Properties of Galactose Oxidase from *Dactylium dendroides* *Marcia H. Mendonca and Glaci T. Zancan* 427

Substrate Inhibition of *Pseudomonas aeruginosa* Elastase by 3-(2-Furyl)acryloyl-glycyl-L-phenylalanyl-L-phenylalanine *Louis Poncz* 508
Purification of Geranylgeranyl Diphosphate Synthase from *Phycomyces blakesleanus* *Friedhelm Lütke Brinkhaus and Hans C. Rilling* 607

GLYCOPROTEINS AND GLYCOLIPIDS

Characterization and Partial Purification of β-*N*-Acetylgalactosaminyltransferase from Urine of Sd(a+) Individuals
Franca Serafini-Cessi, Nadia Malagolini, and Fabio Dall'olio 573

HORMONE STRUCTURE AND FUNCTION

Structure of a Porcine Relaxin Inactive on the Mouse Pubic Ligament
Edward H. Frieden, H. Gail Pollock, Bernard G. Steinetz, and Allen B. Rawitch 334

LIPIDS AND PROSTAGLANDINS

General Kinetic Model for Protein-Mediated Phospholipid Transfer between Membranes *Tetsuro Yoshimura, Ruth Welti, and George M. Helmkamp, Jr.* 299
The Biphasic Effect of Calcium on Lipid Peroxidation *Mark A. Babizhayev* 446
Distinct Long Chain and Very Long Chain Fatty Acyl CoA Synthetases in Rat Liver Peroxisomes and Microsomes *Harmeet Singh and Alf Poulos* 486

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Developmental Changes of the Content of Acetyl-CoA Carboxylase mRNA in Chicken Liver
Toshiyuki Takai, Yoko Saito, Kazuhiko Yamamoto, and Tadashi Tanabe 313
Insulin and Phorbol Myristic Acetate Induce Ornithine Decarboxylase in Reuber H35 Rat Hepatoma Cells by Different Mechanisms
Susan A. Goodman, Brian Esau, and John W. Koontz 343

NEUROSCIENCES

Human Brain "High K_m" Aldehyde Dehydrogenase: Purification, Characterization, and Identification as NAD^+-Dependent Succinic Semialdehyde Dehydrogenase *Maria T. Ryzlak and Regina Pietruszko* 386

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Further Characterization of RLM2 and Comparison with a Related Form of Cytochrome *P*-450, RLM2b
Kenneth E. Thummel, Leonard V. Favreau, John E. Mole, and John B. Schenkman 319
Two Immunologically and Catalytically Distinct Arachidonate 12-Lipoxygenases of Bovine Platelets and Leukocytes
Yoshitaka Takahashi, Natsuo Ueda, and Shozo Yamamoto 613

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Accurate Measurement of Psoralen-Crosslinked DNA: Direct Biochemical Measurements and Indirect Measurement by Hybridization
Noboru Matsuo and Peter Maimon Ross 351

The Binding of 8-Anilino-1-naphthalene Sulfonate (ANS) to Fish Myosin and the Effect of Salts on the Thermal Transitions of Fish Myosin–ANS Complex
Louise Wicker and James A. Knopp 452
Determination of the Quaternary Structural States of Bovine Casein by Small-Angle X-Ray Scattering: Submicellar and Micellar Forms
Thomas F. Kumosinski, Helmut Pessen, Harold M. Farrell, Jr., and Harry Brumberger 548

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Control of Bacteriochlorophyll Accumulation by Light in an Aerobic Photosynthetic Bacterium, *Erythrobacter* sp. OCh 114 *Yuzo Shioi and Michio Doi* 470
Inhibition of Porphyrin Biosynthesis by Exogenous 5-Aminolevulinic Acid in an Aerobic Photosynthetic Bacterium, *Erythrobacter* Sp. OCh 114
Yuzo Shioi, Michio Doi, Kimiko Tanabe, and Keishi Shimokawa 478
An NADP/Thioredoxin System in Leaves: Purification and Characterization of NADP-Thioredoxin Reductase and Thioredoxin *h* from Spinach
Francisco J. Florencio, Boihon C. Yee, Thomas C. Johnson, and Bob B. Buchanan 496
An *in Vivo* ^{1}H and ^{31}P NMR Investigation of the Effect of Nitrate on Hypoxic Metabolism in Maize Roots
Teresa W-M. Fan, Richard M. Higashi, and Andrew N. Lane 592

PROTEIN STRUCTURE AND FUNCTION

Hormone-Containing Peptides from Normal and Goiter Human Thyroglobulins
Carol Dziadik-Turner, James W. Hamilton, Alvin Taurog, and Allen B. Rawitch 377
The Reaction of *Octopus vulgaris* Hemocyanin with Exogenous Ligands: Proposal of an Allosteric Model for the Binding of Cyanide and Thiourea to the 11 S Subunit
Giorgio M. Giacometti, Paolo di Muro, Benedetto Salvato, and Mariano Beltramini 539
Fluorescence from Pyrene-Labeled Native and Reconstituted Chicken Gizzard Tropomyosins *Leslie D. Burtnick, Clive Sanders, and Lawrence B. Smillie* 622

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Soluble Dipeptidyl Peptidase IV from Terminal Differentiated Rat Epidermal Cells: Purification and Its Activity on Synthetic and Natural Peptides
M. Kikuchi, K. Fukuyama, and W. L. Epstein 369
Protein Acylation in *Tetrahymena* *Phillip E. Ryals and Guy A. Thompson, Jr.* 408
Activation of Calpain I and Calpain II: A Comparative Study Using Terbium as a Fluorescent Probe for Calcium-Binding Sites
Un-Jin P. Zimmerman and William W. Schlaepfer 462
Loading Rat Liver Mitochondria with Apocytochrome *c* Provokes Exit of Cytochrome *c* *Vicente J. Miralles, Maria Jesús Marcote, José Hernández-Yago, and Santiago Grisolía* 516

REGULATION OF METABOLISM AND OF ENZYME ACTION

Multiple Mechanisms by Which Glutamine Synthetase Levels Are Controlled in Murine Tissue Culture Cells
Anthony Sandrasagra, Gerald Patejunas, and Anthony P. Young 522

24-Dehydrovitamin D Is a Potent Inhibitor of Rat Liver Microsomal Vitamin D-25-Hydroxylase *Merry J. G. Bolt, Sally A. Holick, Michael F. Holick, Julia MacLaughlin, and Irwin H. Rosenberg* 532
Phosphorylation of the 20,000-Da Myosin Light Chain Isoforms of Arterial Smooth Muscle by Myosin Light Chain Kinase and Protein Kinase C *Ferenc Erdódi, Anikó Rokolya, Michael Bárány, and Kate Bárány* 583

AUTHOR INDEX FOR VOLUME 266 650

The Subject Index for Volume 266 will appear in the December 1988 issue as part of a cumulative index for the year 1988.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Susi, H., and Byler, D. M. (1987) *Arch. Biochem. Biophys.* **258,** 465–469.
2. Bovey, F. A., and Jelinsky, L. W. (1983) Chain Structure and Conformation of Macromolecules, p. 150, Academic Press, New York.
3. Britton, G. (1985) *in* Methods in Enzymology (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

ANNOUNCEMENT

Walter J. Johnson Prize

For the Encouragement of Postdoctoral Research

The Board of Directors of Harcourt Brace Jovanovich, Inc., has established the Walter J. Johnson Prize to be awarded to a deserving individual or individuals having recently completed doctoral studies in the life sciences. The award was established in recognition of Mr. Walter J. Johnson, founder of Academic Press (a division of Harcourt Brace Jovanovich), who has engaged in a lifelong dedication to excellence in scientific publishing. The editorial administrators of three Academic Press journals have been vested with the authority to select the recipients of the Walter J. Johnson Annual Prize: *Archives of Biochemistry and Biophysics, Experimental Cell Research,* and *Journal of Molecular Biology.*

A prize of $10,000 will be awarded by the Editorial Committee of *Archives of Biochemistry and Biophysics* every three years (next in the spring of 1990) to one or more individuals who have recently completed their doctoral studies in the life sciences.

The following guidelines will apply in the selection of recipients of this award:

1. The nomination should be based on the quality of a paper published in *Archives of Biochemistry and Biophysics* during the preceding three years. The nominee must have been the first-listed author.
2. The nominee should have received his/her Ph.D. or M.D. no more than five years prior to the publication date of the article.
3. The Prize may be awarded to one nominee or divided among several nominees.
4. Nominations should be made in writing to the Chairman of the Editorial Committee by a member of the Editorial Board of *Archives of Biochemistry and Biophysics.* Nominations must be submitted by December 31, 1989.
5. Selection will be made by a Committee of Executive Editors of *Archives of Biochemistry and Biophysics.*
6. Awards will be presented next in the spring of 1990 during the dinner meeting of the Editorial Board of *Archives of Biochemistry and Biophysics* held during the Annual Meeting of the ASBMB.
